## **Information Technology Sector**

17. *February 5, Softpedia* – (International) **Flash Player 16.0.0.305 patches zero-day vulnerability.** Adobe released an update for its Flash Player affecting version 16.0.0.296 and earlier versions for Windows and Macintosh that fixes a zero-day vulnerability reported by Trend Micro researchers. The vulnerability was leveraged by attackers through the Hanjuan exploit kit in malvertising campaigns on popular Web sites targeting Internet Explorer and Mozilla Firefox users.  
Source: <http://news.softpedia.com/news/Flash-Player-16-0-0-305-Patches-Zero-Day-Vulnerability-472199.shtml>
18. *February 5, Softpedia* – (International) **Kovter trojan distributed via malvertising on Huffington Post.** AOL removed malicious content from its network after Cyphort researchers discovered the spread of a previously observed malvertising campaign which delivers the Kovter trojan for ad-fraud to popular Web sites through three advertising networks. The researchers also found that this campaign utilizes different command and control (C&C) servers.  
Source: <http://news.softpedia.com/news/Kovter-Trojan-Distributed-Via-Malvertising-on-Huffington-Post-472310.shtml>
19. *February 4, Reuters* – (International) **Accused Silk Road operator convicted on U.S. drug charges.** A federal jury convicted the suspected founder of the

underground Silk Road Web site February 4 on several charges, including conspiracies to commit money laundering, computer hacking, and drug trafficking for his role in an approximately \$200 million anonymous online drug sale scheme involving Bitcoins.
